An accident is an unplanned, uncontrolled event that may result in injury, harm to individuals or groups, or property damage. This course examines the crucial importance of investigating and reporting both accidents and near-miss incidents.

Learners will acquire practical skills in identifying root causes, implementing corrective actions, and fulfilling mandatory reporting requirements to prevent recurrence and promote a safer workplace.

Module 1: What is RIDDOR

Investigating and reporting accidents and near misses is essential for improving workplace safety. By identifying root causes and applying corrective actions, you'll help prevent similar incidents from happening again.

- What is RIDDOR
- Causes and contributions to accidents
- Reporting and investigating incidents

Module 2: Reporting and Record Keeping

Only some incidents need to be reported. In this module, you will learn the definitions of reportable incidents and what should be included.

- Definitions
- Incapacitated workers
- Biological and gas-related incidents
- Your responsibility
- Record Keeping

Suitable for:
Managers who are responsible for workplace safety and or Health and Safety advisors.

Skills achieved:
- Health and Safety (Advanced)
