When external contractors carry out building or maintenance work, the risk profile of a site shifts, sometimes significantly.

This course examines how contractor activity impacts workplace safety and compliance, and outlines the essential steps necessary to protect employees, visitors, and building users.

### **Module 1: Asbestos Awareness**

This course explores how to manage contractors safely and effectively, ensuring all prerequisite processes are in place before work begins.

- Steps to take before appointing a contractor
- The Contractor's Code of Practice
- Contractor's responsibilities
- Requirements to support accidents
- The need for a permit to work
- Precautions to take regarding asbestos
- Precautions when hot working is on-site

**Suitable for:**

Managers who are responsible for workplace safety, Business Owners who own and operate property and Health and Safety Advisors.

**Skills achieved:**

- Health and Safety (Intermediate)

**Related Resources:**

- Contractor Selection Assessment
- Contractor Assessment
