This course is for anyone responsible for the safety of others. It explores the principles of safe working and day-to-day health and safety practices, helping managers prevent accidents and meet legal duties.

Module 1: The Law

The Health and Safety at Work Act 1974 imposes specific duties on employers, employees, and the self-employed, including managing risks and taking practical steps to protect workers from harm.

- The scope of Health and Safety Law
- Accountability within the organisation
- The implications and risks when employing young people

Module 2: Understanding Risk

Safety management is crucial to business success, as it protects employees, customers, and the public from harm. It involves identifying, assessing, and controlling risks as part of everyday operations.

- The four principles of safety management
- Factors that impact safety
- Understanding hazards and risks

Module 3: Hazards and Risks

A risk assessment identifies potential hazards in the workplace and evaluates how they might cause harm. It then outlines control measures to reduce the likelihood and severity of injury or damage.

- Identifying hazards
- The importance of signage
- Importance of risk assessments
- Probability and Severity Matrix

Suitable for:

Managers and Supervisors in health and safety roles, Business Owners and Health and Safety advisors.

Skills achieved:

- Health and Safety (Intermediate)
- Safety Management (Intermediate)
